Environmental
Blends

uttatioils@gmail.com

APPLICATION

Please Note: These blends are highly concentrated. They are not diluted by any product they are to be added to water, hydrosol etc. and their power is actually increased the more they are diluted. Less is more. You do not want to use too heavy a hand and be over whelmed. When diffused these blends are healing not only to you but to all around you.

You can add a drop of a blend to a bowl of water (or a fountain) and place it near your bedside while you sleep, on your desk or in the center of the room where you will be walking around. The drop of oil will float on the water and extend across the surface increasing its evaporation rate.

As people spend a large majority of their time indoors. Indoor pollution in residences, public buildings, and offices is created for the most part by the occupant's activities and their use of appliances, power equipment and chemicals, by wear and tear and out gassing of some structural or decorative materials, by thermal factors, and by the intrusion of outdoor pollutants. Pollutants are major source of stress on human health, activity and welfare.

Uttati's Environmental Blends offer an arsenal of tools to help control and eliminate pollutants and enhance health and wellbeing.

CAUTION: Uttati's essential oils are very potent and should never be taken internally. Although essential oils are used in minute quantities, some individuals may experience allergic reactions to them. To test, apply a minute amount to the skin on the top of the hand between the thumb and the index finger or to the skin just below the elbow. In the event of an adverse reaction, apply vegetal oil such as canola or olive, then wash with cold water.

Disclaimer: The information, opinions, data and statements provided on our Brochure are for educational purposes only and **ARE NOT** intended and **SHOULD NOT** be acted upon or represented as a substitute for professional medical advice, diagnosis, or treatment. Always seek professional medical advice from your physician or other qualified healthcare provider for any questions you may have regarding a specific medical condition and, in particular, to discuss both the advantages and risks of complementary and alternative medical treatment.
