

# Hathor Blends

(Aphrodisiac)

## Products/Price Information

‘Fragrance is a fully developed language of nonverbal communication where messages are exchanged between people to carry fully developed ideas, emotions, and feelings to each other.’

**Raed Rady**

UTTATI

For every beauty there is an eye  
somewhere to see it.

For every truth there is an ear  
somewhere is an ear to hear it.

For every love there is a heart  
somewhere to receive it.

# APHRODISIACS

Most people have heard of aphrodisiacs and have some vague understanding that they are substances that are used to evoke sexual desire and enhance pleasure. However, the majority seem to associate them with foods, herbs or drugs, everything from oysters, to powdered rhinoceros horn to Viagra. They know how to “set the mood” with soft music and candlelight. Yet they never seem to consider the role of the sense of smell in sexual desire and pleasure.

Although they may be quite aware of the sense of smell during physical love making they don't seem to realize that odors themselves are powerful aphrodisiacs both prior to and during lovemaking. They don't seem to realize the power of scent to induce powerful chemical responses in the center of the brain that has to do with emotions, memory, physical desire **AND** physical sexual **RESPONSE**. This is so even at levels below their ability to even notice their existence.

This knowledge and these essential oil blends used to be available only to royalty, the cost of their ingredients far beyond the reach of the common man or woman. We are profoundly honored to be able to bring you these rare and precious blends to finally make

available to all this secret ancient knowledge of love and these special aphrodisiac blends ability to transform your experiences from the physically ordinary to the divinely ecstatic.

## THE HATHOR SET

Hathor was the Egyptian patron of love, pleasure and joy. The aphrodisiac blends formulated in her name have potent aroma therapeutic properties that enhance sexual intimacy through the use of essential oils traditionally recognized for their support of body systems involved in sexual activity.

Each blend has unique aromatic and sensual properties that create pleasure when used individually. However, the blends are chemically integrated to ensure that the flow of pleasure continues uninterrupted. Prolonged and continued use of an aphrodisiac can cause the body to chemically adjust to its stimulating properties This will result in a noticeable reduction of effects. By periodically interrupting this cycle of adjustment through the short term use of a balancing blend, pleasure and sensual effects can be extended and enhanced.

# INTENS, ESSENS, EXTENS

## A CALL TO LOVE AND PASSION:

The following trio of aphrodisiac blends have been especially designed to work together to invoke, restore or repair love and deepen passion.

## INTENS

This preparatory blend lays the foundation for relationship by powerfully arousing and invigorating latent emotional warmth, physical desire and sexual response. It can be used by either a man or a woman to awaken a continuing stream of excitement.

**Caution:** Use with care. This potent blend is best used when you are alone at night or with your partner in the bedroom. Wearing it during the day in public places may incite a riot.

## ESSENS

This deeply sensual blend stirs the imagination, warming the heart and strengthening the flame of physical desire. It starts where **INTENS** ends. It was created to boost the effect of the first blend by deepening and opening communication between lovers, intensifying affection and the level of physical response. Unselfish kindness and caring for the other's well being is increased.

## EXTENS

This highly complex blend was created specifically to heighten and enhance the power of the previous two blends.

After you have used **INTENS** and **ESSENS** continually for three months, replace them with **EXTENS** for one month. This blend does not play any specific role by itself, it was created solely to work in concert with the other blends.

These three blends are the blends of "new beginnings". They are for those who are finding the courage to "start over" after a divorce or loss of a love or for those who wish to rekindle the flame of desire in a long term relationship that has lost its passion. They are for those whose life situation or mental focus has not allowed them the opportunity to enjoy the pleasure of the opposite sex for quite a long time either because of isolation, illness or simply over preoccupation with work.

## FLIRTATION

Especially created for lovers to entice and excite while preparing the mood for a romantic and sensual evening alone together. It is made from bergamot, cinnamon, jasmine, nutmeg and 8 other essential oils known for their unique aphrodisiac properties.

"Sex is more than an act of pleasure, it's the ability to be able to feel so close to a person, so connected, so comfortable that it's almost breathtaking to the point you feel you can't take it. And at this moment you're a part of them."

## HEART-TO-HEART

The perfect blend for **Valentine's Day**. Your *Heart* is wide open. You are in love with love and life. The world is your playground and you joyfully share with your beloved all the of its pleasures. You are two beings drinking from the same cup of wine, gazing into each others eyes and breathing as one. This very special blend joyfully celebrates and deepens your union.

"I awoke this morning to find myself much to my astonishment and delight emanating the fragrance of you, yet from my own body.

...A powerful, beautiful, complex bouquet of interbeing."

Anonymous

## RENDEZVOUS

A sophisticated blend, an invitation to intimacy, kindling the warmth of emotional expression and stirring the desire for physical communication. It includes over 20 rare and precious oils such as Amber, Buddha Wood, Jasmine, Musk and Neroli.

## SOUL TO SOUL

This blend represents the culmination of love at the highest level of union in every aspect of love's expression so perfectly exemplified by the poetry below

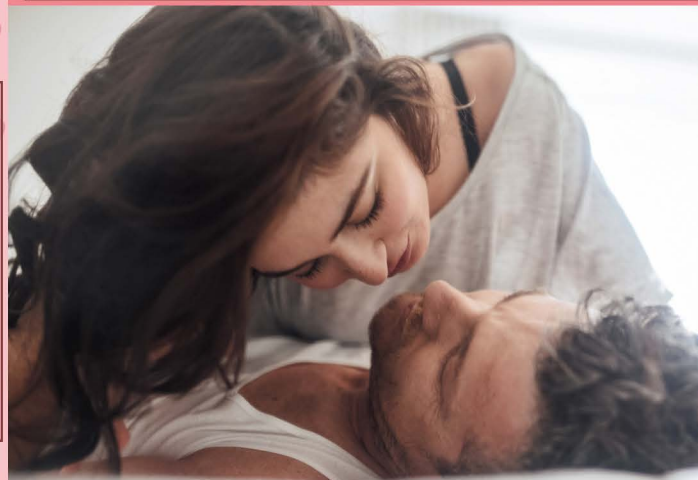

To know the pain of too much tenderness.

To be wounded by your own understanding of love;

And to bleed willingly and joyfully.

To wake at dawn with a winged heart

And give thanks for another day of loving;.

# Ugly Men good News!

In an article published in a Dutch Trade Magazine, under the heading "Fragrances are Packaged Dreams", appeared some new facts to ponder in the mystery of the sexes. An Austrian research project dealing with "Fragrance and Partners", discovered that women prefer the body-odor of ugly men! Men on the other hand like the odor of pretty women. The theory is that women are subconsciously searching for men with another type of "major histocompatibility complex" (MHC), a substance that is of paramount importance by the correct functioning of the immune system. When women began taking the birth control pill, their fragrance/odor preference changed to men with the same MHC-group. So, according to this theory the use of [synthetic] perfumes as well as the use of the "Pill" are a serious handicap to finding the most suitable lover." (Ibid.) The Aromatic Thymes Vol. 6, #4 1999.

"...A truly aphrodisiac perfume is one that triggers our unconscious memory of our animal nature in all its erotic manifestations. It is an artful construction of scents based on the impolite smells of the human body. It points to a little-acknowledge truth about the relationship of scent to sexuality: sexy smells are subliminally reminiscent of the smell of sweat and of the hairy regions of the human body.

The odor of our species at its most animal is the heart of Eros." ....But Eros is also about the transcendence of the ordinary into the sublime Jim Drobnick."

-The Smell Culture Reader

*"It is not the yin and the yang, the light and the dark, night or day, where the mystery lies, but rather in their point of fusion. By surrendering to and dwelling in the privilege of her deepest essence - woman, she reflects to man the power and the privilege of his deepest essence - man.*

*When he returns this gift an alchemical transformation occurs and in their fusion there are no longer two beings no longer man - no longer woman - no longer human but one in the depth of the cosmic embrace."*

PHP

## APHRODISIACS

Now what if one of you does not like the smell? This happens sometimes because the blends trigger thoughts and feelings that one may not want to deal with. In fact it is quite informative. When one is loving and open emotionally the scent is rarely a problem. Perhaps you are in a long term marriage where you are together simply because of the children and only one of you is committed to resuming the depth of the loving relationship that you once had. If your partner does perhaps it is you who does not like the smell. You have been through a painful divorce and are having trouble opening your heart to be loved again.

### ORDER OF USE

*Place, companion and personal situation dictate how one should use each blend. The purpose behind each blend dictates the order in which you should use them.*

UTTATI

Thank you!
