SUFI BLENDS
INFO AND PRICE LIST

Uttati

“Human life is but a Journey (Safar) and the Seeker after God is a traveler (Salik).”

The great business of the traveler is to exert himself and strive to attain that perfect knowledge (Ma'rifah) of God which is diffused through all things, for the Soul of man is in exile from its Creator, and human existence is its period of banishment.

The sole object of Sufism is to lead the wandering soul onward, stage by stage, until it reaches the desired goal of “Perfect Union” with the Divine Being. The SUFI Path (Atria) is a dialectical process which transforms the person through LOVE... A journey involving both creativity and passion. For the Sufi, one's yearning for God provides a means to be ultimately consumed by Love.

Sufi Aromatherapy Blends

Only from Uttati will you find Sufi Aromatherapy, which has been brought to fruition by its chief inventor, Raed Boutros. Sufi Blends line is the perfect example of why Uttati is always one step ahead of its competitors with its innovative and original aromatherapy.

Sufi healing can be understood as a healing process through selective oils and is based on Sufism. Sufism is an esoteric dimension of Islam known also as Islamic Mysticism. Because of its origins that come from various words with separate connotations, Sufism is difficult to accurately define. According to the BBC, however, Sufis are, “amongst other things, sagacious, cheerful and disarming. Sufis share these personality traits because they are emphatic that Islamic knowledge should be learned from teachers and not exclusively from books.”

For this reason, Uttati’s Sufi Blends offer a wide assortment of oils for relaxation and happiness. Our Sufi Blends, moreover, have been named after ancient Sufi words and saints to portray their respective effects, significance and healing properties. Baraka, for example, is an ancient Sufi word, which means “breath,” “blessing,” or “grace” – all of which can be translated into this Sufi Blend. Rabaa, on the other hand, is named after RabaaAl-Adawiya, a renowned

medieval Sufi Mystic, who pleaded with her God. Rabaa’s devotional love of Allah is widely viewed as commendable. Another of our unique Sufi Blends, Tasawuf, is the science of “Tazkia Tun Nafs” and can be translated as another word for Sufism as a part of Islam. Thus, Uttati continues to be an innovator in the essential oils market with the expansion of its one-of-a-kind blends that have been painstakingly designed and processed to meet the unique needs of our customers. The Sufi Blends from Uttati will help you transcend the hardships of day-to-day life with inventive and truly powerful oils.

The Sufi Doctrine

- 1) God only exists. He in all things, and all things in Him.
- 2) All visible and invisible beings are an emanation from Him, are not really distinct from Him.
- 3) Religions are a matter of indifference; they, however, serve as leading to realities. Some for this purpose are more advantageous than others, yet Sufism is the true Philosophy.

The principal occupation of the Sufi, whilst in the body, is meditation on the Wahdaniah or Unity of God, the Remembrance of God's names (Zikr) and the progressive advancement in the Tariqah, or Journey of Life, so as to attain unification with God.
